SUMMARY

Engineer by heart. Father of two.

Strategic and results-driven Software Architect with over 16 years of experience designing and leading enterprise-wide technology initiatives.

Skilled at aligning IT architecture with business objectives to drive digital transformation, enhance operational efficiency, and support scalable growth. Proven track record in managing cross-functional teams, delivering innovative solutions, and fostering strong stakeholder relationships across all levels of the organization.

EXPERIENCE

Team Lead - Enterprise Solutions Architect

Bosch Rexroth April 2024 – December 2025

- Led and mentored junior developers and architects.
- Planned, coordinated, and delegated tasks to internal and external team members.
- Selected the technology stack for integrating new software products into the Industrial Hydraulics product ecosystem.
- Accelerated the integration process by initiating successful automation initiatives
- Ensured software delivery complies with cybersecurity, regulatory, and governance requirements.

- Led the design and implementation of a Service-Oriented Architecture (SOA) for the software ecosystem, fostering collaboration across business units.
- Defined integration strategies for internal and external systems, including Customer Relationship Management (CRM) and Identity and Access Management (IAM) platforms.
- Collaborated with external suppliers and internal IT teams to design and implement robust solutions and application interfaces.
- Advocated for business unit requirements in central projects, ensuring their successful fulfillment.

Presales Solution Architect

Bosch Rexroth June 2021 – March 2024

- Devised a practical, end-to-end licensing solution to generate revenue from software capabilities.
- Architected a unified User Interface (Ul) platform to standardize the user experience across the business unit‘s product portfolio.
- Led the identification and analysis of architectural drivers and made key design decisions.
- Managed stakeholders—including customers, sales teams, and R&D leads—within the area of responsibility.
- Served as the primary point of contact for all software monetization initiatives within the business unit.
- Acted as liaison across Operational Technology (OT) and Information Technology (IT) teams.

Software Architect

Ibeo Automotive Systems June 2019 – May 2021

- Identified the software requirements for sensor calibration functionality based on the Product Requirements Document (PRD).
- Developed algorithms for aligning Lidar sensors within vehicles to precisely adjust their field of view relative to the vehicle body.
- Implemented regression tests to seamlessly integrate software modules into production, significantly reducing system integration failures by 93%.Be as precise as possible.

Software Developer

Ibeo Automotive Systems April 2018 – May 2019

- Developed a tool for evaluating online sensor calibration algorithms, reducing evaluation time by 30%.
- Refactored and applied object-oriented design principles to improve software maintainability and extensibility.

Full-stack Web Developer

DEMV Systems April 2015 – September 2017

- Developed and deployed a web-based Customer Relationship Management System (CRM) for insurance industry.
- Extended the lifespan of a legacy system that compares offers from different insurance companies, enabling continued operation for over 3 years.

Software Tester

Berenberg Bank December 2013 – May 2014

Validated algorithms developed by the team, ensuring the accuracy and reliability of outcomes, and reinforcing the bank's commitment to delivering precise and trustworthy results.

Software Developer

ted April 2013 – November 2013

Implemented a comprehensive noise monitoring system for residential neighborhoods surrounding Hamburg port. The solution measures and analyzes noise levels to provide valuable insights and improve quality of life for the local community. Key functionalities included:

- Continuous evaluation of measurement data from dedicated monitoring stations.
- Visualization of measurement data.
- Extraction of segmented audio data from various binaries.
- Generation of playable WAV files accessible for download through the user interface.

Software Developer

Xsoft December 2009 – December 2011

Developed a robust Windows desktop application designed for the accounting department of clearance agencies serving Latakia port using the .NET framework.

EDUCATION

M.Sc. | Computer Science
University of Hamburg . Hamburg, Germany . 2014 - 2018

B.Eng. | Computer & Automation Engineering
University of Latakia . Latakia, Syria . 2004 - 2009

CERTIFICATIONS

Certified Professional for Software Architecture - Advanced Level (CPSA A)
(April 2026)

TOGAF Enterprise Architecture: Applied Practitioner
August 2024

OMG Certified UML Professional: Fundamental (OCUP)
December 2023

Oracle Certified Associate (OCA)
February 2009

SKILLS

Doing More With Less, Technical Leadership, Mentoring, Presentation Skills, Negotiation, Customer Satisfaction, Change Management, Stakeholder Management, Task Delegation, Creative Thinking, Conflict Management, Decision Making, Problem Solving, Critical & Abstract Thinking.

Software Development for Enterprise, Software Platform Architecture, Microservices SOA Architecture, Test-Driven Development (TDD), Domain- Driven Design (DDD), Information Security.

Generative Artificial Intelligence, API-First Architecture, Microservices, Agentic RAG, Containerization.

Arabic, English, German.
